SUMMARY

I am a hard-working and motivated student pursuing a Bachelor's in Information Systems. I can offer a range of skills and the capacity for learning new ones. I have experience collaborating as part of a team as well as assuming more of a leadership role.

EDUCATION

Arkansas Tech University in Russellville, AR — *BS - Information Systems*

Anticipated Graduation Date: December 2020

PROJECTS

S.W.O.L. Web Application **https://github.com/SarahBethCox/swol-web-app**

- Tasked to work with a secure transportation business as a fall semester senior project.
- They required a website that enabled users to place orders, contact the business using email, and allow administrators the ability to view and manipulate the database.
- This application was completed using Angular, Bulma, TypeScript, HTML, CSS, and hosted using Firebase.

Crow Mountain Fire Department **https://github.com/SarahBethCox/CrowMntFire**

- Currently working with a local fire department as part of a spring semester senior project.
- They require a website that includes their facebook feed, electronic volunteer forms, an informational page about fire trucks and equipment, as well as an administrator view of the database.
- This application will be completed using Python, Django, Bootstrap, HTML, CSS, and SQLite.

EXPERIENCE

Umami's Sushi Bar and Grill in Russellville, AR — *Manager*

October 2016 - PRESENT

Job Duties: Hire and train staff, ensure company protocols are being followed, and resolve customer complaints.

Major Contributions: Created Excel workbooks with macros that enabled the owner to efficiently switch from paper records to electronic records. This gave them the ability to track sales, tips, wages, food orders, and make weekly schedules in Excel.

SKILLS

Python	Angular	Django	C#	C++
SQL	AWS	JavaScript	HTML	CSS
SQL Server	SQLite	MySQL	Excel
